Analysis of Students Satisfaction Survey

In academic year 2021-22, we have taken student satisfaction survey through Google form. In this we have collected responses regarding teacher performance, library, college infrastructure, curricular and co-curricular activities and non-teaching performance. A list of 20 questions was prepared related to different parameters.

Almost all the students respond positively as 52.7% to 63.8% scores were given as the students agreed for whatever questions were asked regarding their satisfaction for different variables. The students have strongly agreed for the same variables in the range of 28.4% to 43.7%. A few students disagreed and strongly disagreed with some variables.

After analysis the document was submitted to principal. That was further discussed in the meeting and was decided to cover the loop holes in the related areas.
