Proposal for One day National Workshop on "Remote Sensing"

India's remote sensing program was developed with the idea of applying space technologies for the benefit of humankind and the development of the country. India was the world's first space agency to find water on the moon and insert a probe in orbit of Mars in its maiden attempt.

Remote sensing is the process of acquiring information, detecting, analysing, monitoring the physical characteristics of an area by recording it is reflected and emitted radiation energy without having any physical contact with the object under study. Some of the major applications of remote Sensing is in Agriculture, Climate Change, Disaster Mapping, Hydrology, Soil Moisture, Water Pollution, Forest Fire, rise of sea level Biomass estimation, Crop Condition Mapping, Archaeology, Snow Cover, Glacier Melts Analysis, Ocean Science, as well as in Business like Counting Cars, Movement of Population, City Planning, Mineral Identification, Geohazard Mapping, Early detection of Cyclone, Earthquake, Tsunami, Flood Mapping and many more.

We are forming a group of colleges to conduct One day National Workshop on "Remote Sensing". In the area of Marathwada. This workshop will cover both theoretical as well as practical oriented aspects on recent development in the field of Remote Sensing and is of interest to both faculties and students.

We Conduct the proposed workshop through virtual mode. The organization, registration process and Certificate issue will be carried out on mutual understanding with all participating Institutes. We need technical support like eminent Speakers from IEEE-GRSS Bombay Chapter who will deliver talk on different aspects of Remote Sensing. We are grateful work with IEEE-GRSS Bombay Chapter to promote the truly Interdisciplinary and Important subject Remote Sensing in the Marathwada Region of Maharashtra.
